DISSOLVED GIRL

## **BAND BIO**

Dissolved Girl is a four piece band from London, fused by a love of 90s trip hop, alt rock, complex soundscapes and melodic hooks. Their debut album has been meticulously crafted over the past four years, produced by Dani Castelar (x 2 No. 1 albums with Paulo Nutini) and mastered by Matt Colton (Arctic Monkeys, Michael Kiwanuka, Royal Blood).

DG views it as their duty to ensure that raw emotion and sophistication remains a vital part of modern music.

And that bands are still important.

## **DEBUT SINGLE 'RECKONING' RELEASED 13 NOVEMBER 2023**

On 13 November 2023, Dissolved Girl releases its lead single 'Reckoning' from their debut album. Two time No. 1 Producer Dani Castelar co-produced and mixed the record, which is described by Paulo Nutini's management as "f\*\*king brilliant".

'Reckoning' confidently announces the band's unique sound. A kitsch intro about turns into an ominous sounding drop-out hook. And after 45 seconds we get the first intro to the track's powerful and emotive vocal performance.

When the MASSIVE sounding drums land in Verse 2, the trip hop influence is clear... but the song's unique configuration is also powered by driving synths and bass, psychedelic Leslie guitar and an intricately layered sample mood board that evokes a dark, cinematic vibe.

DG's lead single 'Reckoning' is proper music for proper music lovers.
